Gentelmen & Ladies

I am before you to ask foregiveness and understanding for your prision facility & medical facility. It is flawed severly; not only have they murdered many inhabitants but have done so without remorse; look up your own records.

I was institutinalized with personal medical records that informed DA, Judge, PD, and Judicial prizon system of medical & medicines necicary to my care as a TBI person. They still denied and changed medicine & medical needs as they saw fit to accomodate financial needs medical & benefits. I am here not to cause trouble but to rectify the situation for me and others. I believe in the punishment of criminals but do not believe they should do undo fisical punishment (ie medical & fisical) excessive punishment due to neglect.

They have preached Rehab and have no Rehab persosonal. I had meet many personsons who have had need of rehab ~~needs~~ and Recieved none. I am here to Request a hearing that could Rectifie situations of what has accoured and continues to. I am not at the position to change what accours but am willing to take a position where it could benifit the state and prizoners. ~~Hores~~ it ~~Key~~ lies

There has to be a way the prizon can change. The law suits alone could aford the change financially. You can not be this blind to see the cost overruns in the prizon medical system.
