¹The total population forecast was derived by the JFA Institute in January of 2019.

²The total population minus the population on escape, residential confinement, or serving sentences out of state on interstate compact programs equals in the in-house population.

³The outcount is forecast by the NDOC for each budget phase.

⁴The outcount for the male population does not include individuals housed in contracted private facilities outside the Nevada prison system. Outsourced beds are encompassed in one budget category and treated as if they were part of an additional unit in the in-state correctional system. Therefore, individuals in contracted facilities are included in the in-house population.
