<sup>a</sup> Beginning with Fiscal Year 2016, Cuban nationals were grouped with Hispanics.

<sup>b</sup> The NDOC must be able to identify offenders that fall in various age categories to determine the applicability of laws and regulations that are specific to the individual's actual age. Thus, Beginning with Fiscal Year 2016, age groups no longer encompass ages that are rounded down or up. The change in methodology may have caused a small shift in the frequencies that fall in each group relative to former editions of this report.

**Data Limitations:**

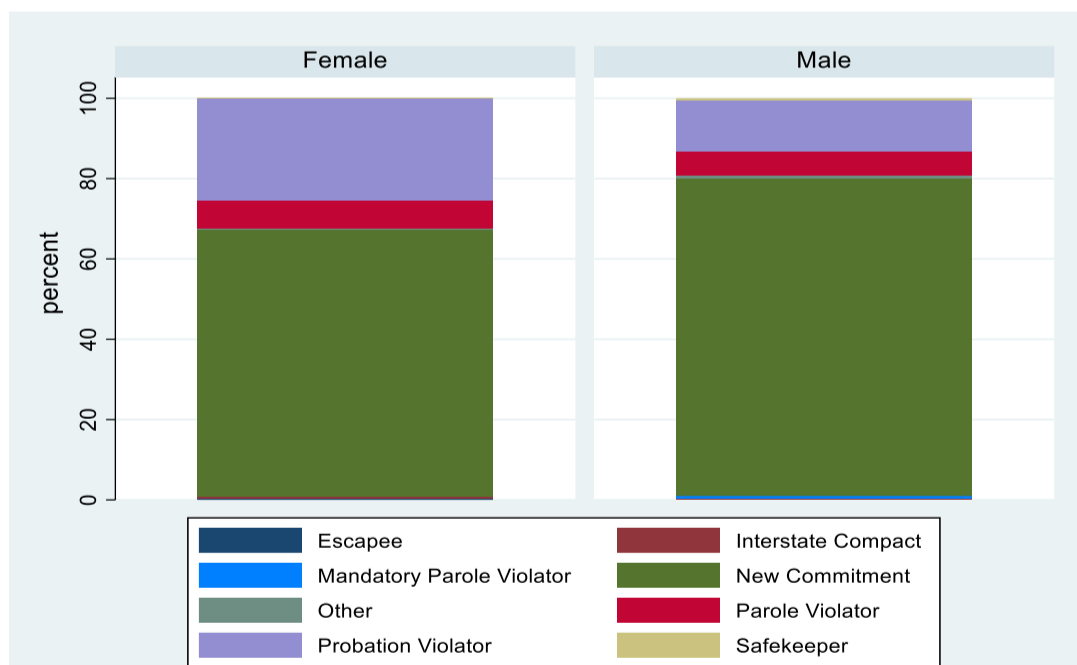

Data published in this report were extracted from a live database; thus, it is possible that figures reported in tables and charts do not balance to totals reported in other reports published by the Nevada Department of Corrections (NDOC). Select distributions consist of estimates and are susceptible to rounding error and missing data that could have caused these distributions not to add up to exactly 100%. Current fiscal year data for the NDOC or for other agencies are not always available at time of edition; consequently, the NDOC performed its best effort to align data accordingly to derived estimates.

Unless specified, figures in this report are retrieved from the Nevada Department of Corrections InfoView data warehouse and from the Nevada Department of Corrections Offender Tracking System (NOTIS).

## Imprisonment Statuses and Counties of Conviction for the Total Population

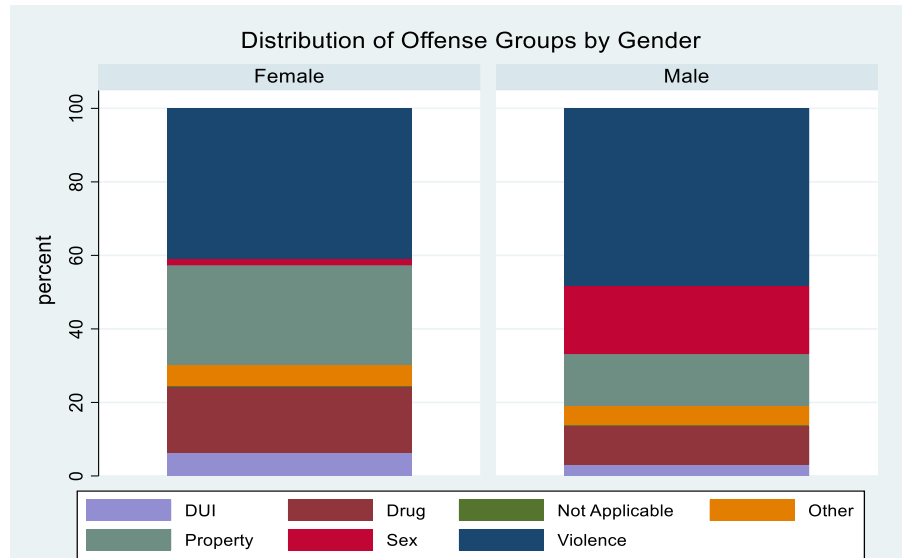

Imprisonment Status <sup>a</sup>	Males	%	Females	%	Total	%

<sup>a</sup>

The figures in this table represent the distribution of offenders by gender and highest offense across bookings with the NDOC. The highest offense is determined by a hierarchical method applied by the NDOC that consists of grouping instant offenses committed by the offender as per the severity of the offenses. Offenders are placed in the offense group that pertains to the most severe instant offense that he or she has committed.

Range	3.99%	2.16%	2.64%	3.70%	3.31%	4.20%	

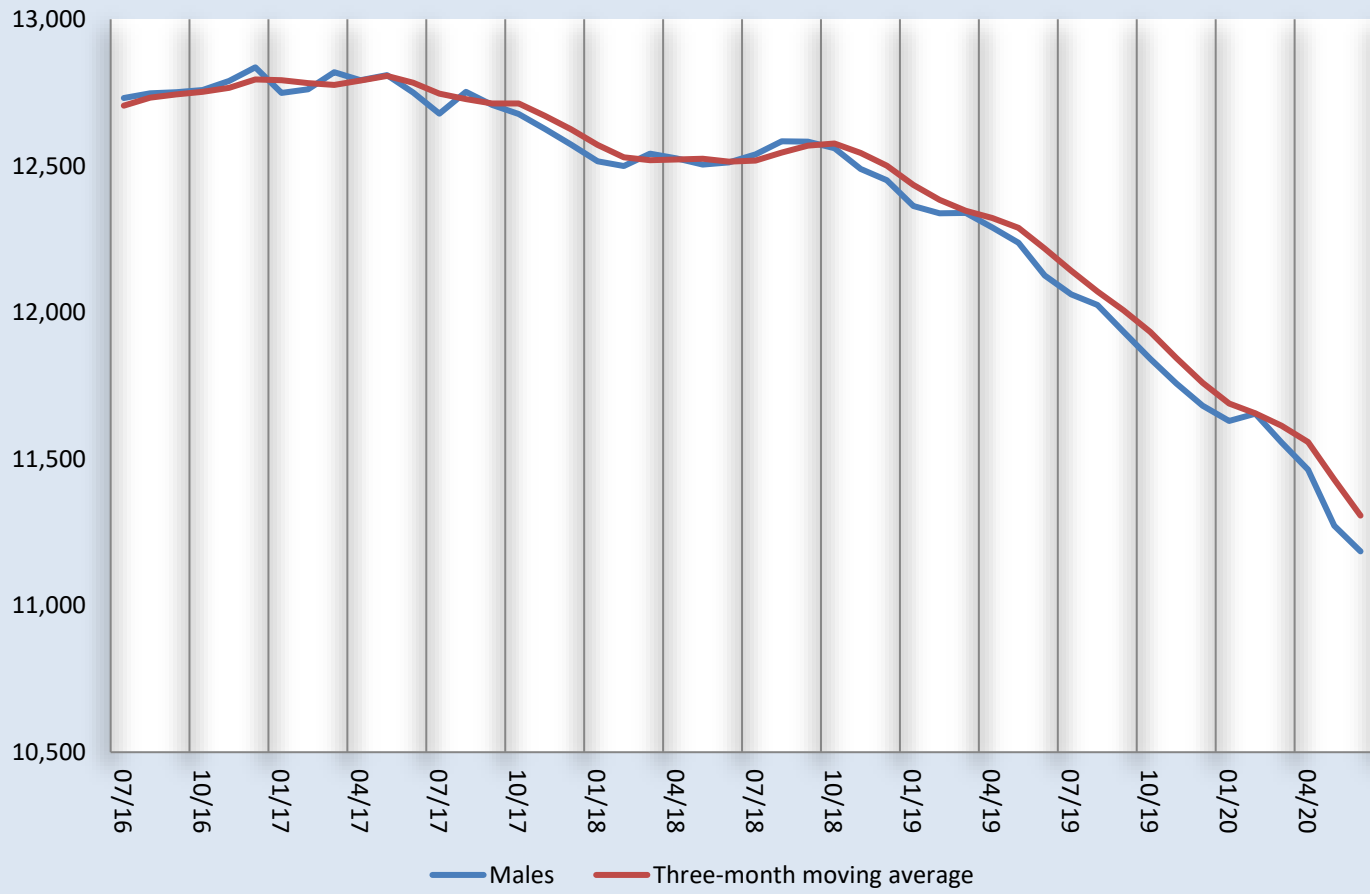

<sup>a</sup> Beginning in November 2017, the NDOC contracted private prison beds to house its excess population temporarily. The custody distribution displayed in this report includes 100 individuals housed in a private facility. Custody distribution series are maintained for master planning purposes and are entered into forecasting models that assume that these prisoners will return to one of the state facilities after the end of the contract period.

<sup>a</sup> This table lists the correctional sites that have experienced escapes, walkaways, or recaptures only. A negative balance means that during the reporting month the correctional site recaptured offenders that escaped in previous reporting periods.

<sup>b</sup> For statistical purposes, it is assumed that the inmate is returned to the location from where he or she escaped or walked away, although inmates are recaptured by law enforcement and then re-admitted to an NDOC intake center.

<sup>a</sup> The prison population inclusive of residential confinement inmates, escapees, prisoners serving a sentence out of state, or intermediate sanction.

<sup>b</sup> The in-house prison population consists of all inmates housed at an NDOC correctional location, and prisoners temporarily housed at a jail or admitted to a hospital.

<sup>c</sup> Offenders admitted to the NDOC during the current biennium. The caseload is inclusive of offenders admitted to the parole housing program.

<sup>d</sup> Offenders released from the NDOC during the current biennium. The caseloads include offenders released to the Parole Housing Program, and then released to the community.

<sup>e</sup> Prisoner population forecasts derived by the JFA Institute/JFA Associates and approved by the Legislature for the current biennium.

<sup>f</sup> The actual prison population, inclusive of individuals within NDOC's jurisdiction housed in private facilities.

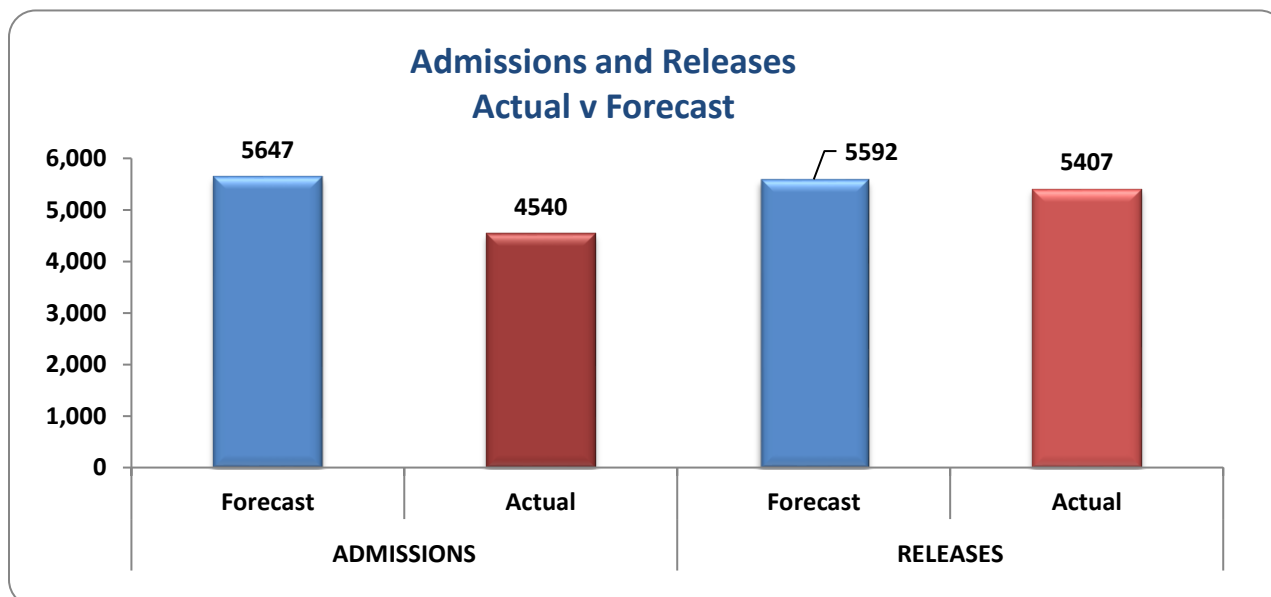

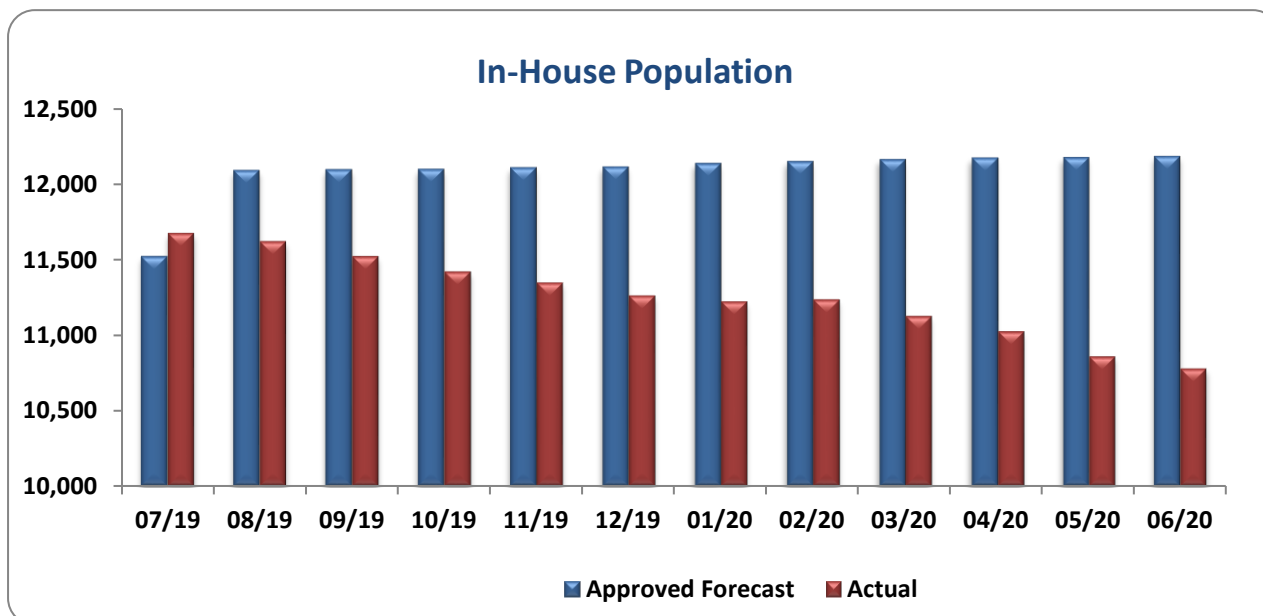

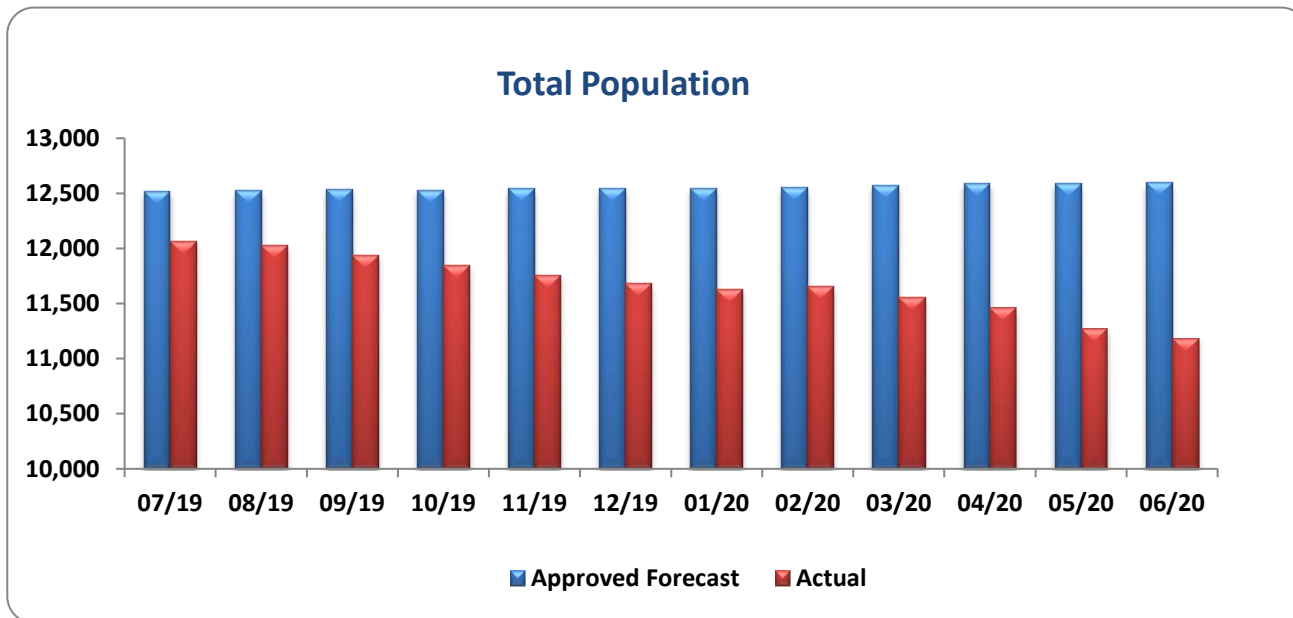

<sup>g</sup> The Mean Squared Error is the average of the squared differences between the actual and forecasted counts. The Root Mean Squared Error is the squared root of the Mean Squared Errors.

<sup>h</sup> The Root Mean Squared Error as percent of the actual average-to-date is a measure of prediction.

Note: Casa Grande Transition House offers a program for individuals that are granted parole, are authorized to work in the community, and for whom housing arrangements in the community are pending. During State Fiscal Year, 106 inmates were transferred from a housing location within NDOC to the Parole Housing Unit. The Parole Housing Program, however, was phased out in the summer of 2020.

Beginning in November 2018, 100- 200 private prison beds were rented while the NDOC was awaiting the completion of retrofitting projects.

Summary of Macroeconomic and Employment Indicators

- The employment outlook for Nevada at the end of Fiscal Year 2020 didn't fare as well as prior quarters. At Fiscal-year-end 2019, Nevada's unemployment rate reached a one-time low of 4.0%, which is 2.0% below the natural rate. Unfortunately, the rate jumped to 15.0% by the end of June 2020, due to the pandemic created by COVID-19, and that resulted in a reduction of 194,954 persons employed after adjusting for seasonality. By the end of Calendar Year 2019, however, Nevadans per capita income increased by \$6,454 relative to the end of Calendar Year 2018.
- Protective service occupations is a large occupational group that encompasses various sub-groups, such as police officers, firefighters, animal control workers, and correctional officers employed by various industries and public sector.
- It is estimated that at year-end CY2016, 42,650 workers were employed in protective service occupations across all industries who earned a mean wage of \$21.42 per hour or \$46,980 per year. This occupational group was projected to reach 43,875 by the end of CY2019. The actual number of protective services workers fell short of the projection reaching 43,660, and it is projected that by the end of CY2021 it will rise by 1.87% and reach 44,476. NDOC assumes that employment dynamics will be subject to significant fluctuation, however, and deviate from historical trends given the recession that started in February 2020 and that resulted in the largest downturn in the U.S. economy since 1940.
- Correctional officers and jailers is a narrower occupational group among protective service workers, representing 2,940 employed persons as of CY2019 year-end, and that realized a year-over-year increase of 260 employed persons. Correctional officers and jailers in Nevada earn a mean wage of \$30.33 or \$63,090 per year- a wage that is above the \$24.10 or \$50,130 per year earned by the same type of workers in the U.S. as a whole. This wage includes overtime and police and firefighter retirement compensation.
- For SFY 2020, the Nevada Legislature authorized 912 non-custody and 1,910 custody full-time positions, an increase of 36 positions from SFY 2019. As of the end of the fiscal year, 1,740 and 900 positions were filled, respectively. Filled positions were below budgeted positions for various reasons, such as the ability to recruit officers in remote areas of the states, retirements, and the hiring freeze instituted in March 2020 to help reduce the budget short-fall caused by business closures.

Full-time Equivalent Positions SFY 2020

Nevada Macroeconomic Indicators	CY 2020 Q2	CY 2019 Q4	CY2018 Q4	CY2017 Q4

Motor vehicle theft	▼ -6.81%	▼ -4.47%

- From 2018 to 2019 the size of the U.S. population increased by 0.48% while Nevada's increased by 1.51%.
- In Nevada, the largest decline was in murder and manslaughter (-31.34%), while for the U.S. the greatest decline was in burglary crime (-9.92%).
- Crime rates in Nevada were as low as 4.6 per 100,000 inhabitants for murder and manslaughter and as large as 2,321 per 100,000 for property crime.
- In all of the U.S. murder and manslaughter was as low as 5.0 per 100,000 inhabitants and property crime as large as 2,109.9 per 100,000.
- Nevada shares common characteristics with all of the U.S. in that property and larceny are the two major UCR crimes. Violent crime and rape rates, however, are more pronounced in Nevada, while larceny-theft crime is more pronounced in the U.S. as a

UCR Crime	Nevada	U.S.
Murder	4.6	5.0
Rape	70.2	42.6
Robbery	106.7	81.6
Assault	312.3	219.9
