${ }^{\text {a }}$ Beginning with Fiscal Year 2016, Cuban nationals are grouped with Hispanics.
${ }^{\text {b }}$ The NDOC must be able to identify offenders that fall in various age categories to determine the applicability of laws and regulations that are specific to the individual's actual age. Thus, Beginning with Fiscal Year 2016, age groups no longer encompass ages that are rounded down or up. The change in methodology may have caused a small shift in the frequencies that fall in each group relative to former editions of this report.
${ }^{\text {c }}$ The figures in this table represent the distribution of offenders by gender and highest offense across bookings with the NDOC. The highest offense is determined by a hierarchical method applied by the NDOC that consists of grouping instant offenses committed by the offender as per the severity of the offenses. Offenders are placed in the offense group that pertains to the most severe instant offense that he or she has committed.

## Data Limitations:

Data published in this report were extracted from a live database; thus, it is possible that figures reported in tables and charts do not balance to totals reported in other reports published by the Nevada Department of Corrections (NDOC). Select distributions consist of estimates and are susceptible to rounding error and missing data that could have caused these distributions not to add up to exactly 100\%. Current fiscal year data for the NDOC or for other agencies are not always available at time of edition; consequently, the NDOC performed its best effort to align data accordingly to derived estimates.

Unless specified, figures in this report are retrieved from the Nevada Department of Corrections InfoView data warehouse and from the Nevada Department of Corrections Offender Tracking System (NOTIS).

## Distribution of Offenders by Ethnicity

In-House Population as of March, 2018

${ }^{\text {a }}$ Trend changes from 2013 to 2014 are due to a system wide bed custody realignment.
${ }^{\mathrm{b}}$ The distributions for quarters ending December 2014 and March 2015 were estimated by applying the custody of each unit and wing at each correctional site to the in-house inmate population.
${ }^{\text {c }}$ Beginning in November 2017, the NDOC contracted private prison beds to house its excess population temporarily. The custody distribution displayed in this report assumes that the outsourced population is still housed in medium, close, or maximum custody housing units. Custody distribution series are maintained for master planning purposes and are entered into forecasting models that assume that these prisoners will return to one of the state facilities after the end of the contract period.

a This table lists the correctional sites that have experienced escapes, walkaways, or recaptures only. A negative balance means that during the reporting month there were offenders recaptured but no escapes

A negative balance represents an escape or walkaway in an earlier month/fiscal year and a recapture during the current month/fiscal year.
${ }^{c}$ For statistical purposes, it is assumed that the inmate is returned to the location from her or she escaped or walked away.

## Escape to Population Statistics for Fiscal Year 2018

| Month | In-House <br> Population | Escapes/ <br> Walkaways | Rate per <br> 10,000 <br> Inmates |

${ }^{\text {a }}$ The prison population inclusive of residential confinement inmates, escapees, prisoners serving a sentence out of state, or intermediate sanction.
${ }^{\mathrm{b}}$ The in-house prison population consists of all inmates housed at an NDOC correctional location, and prisoners temporarily housed at a jail or admitted to a hospital.
${ }^{c}$ Offenders admitted to the NDOC during the current biennium. The caseload is inclusive of offenders admitted to the parole housing program.
${ }^{d}$ Offenders released from the NDOC during the current biennium. The caseloads include offenders released to the Parole Housing Program, and then released to the community
${ }^{e}$ Prisoner population forecasts derived by the JFA Institute/JFA Associates and approved by the Legislature for the current biennium.
${ }^{\dagger}$ The actual prison population, inclusive of individuals within NDOC's jurisdiction housed in private facilities.
${ }^{\mathrm{g}}$ The Mean Squared Error is the average of the squared differences between the actual and forecasted counts. The Root Mean Squared Error is the squared root Mean Squared Error.
${ }^{h}$ The Root Mean Squared Error as percent of the actual average-to-date is a measure of prediction. To the community.
Note: during 2017, there were 96 male beds allocated to the Parole Housing Program. This program provides temporary housing to inmates that are awarded parole and are still developing their housing arrangements in the community. In March of 2018, the number of beds for this program was reduced to 48. During the first half of Fiscal Year 2018, 140 males were admitted to the program and 138 male offenders were released from the program.

Note: during 2017, there were 48 female beds allocated to the Parole Housing Program. This program provides temporary housing to inmates that are awarded parole and are still developing their housing arrangements in the community. During the first half of ${ }^{j}$ Fiscal Year 2018, 52 males were admitted to the program and 44 female offenders were released from the program.

## 10-YEAR POPULATION FORECASTS APPROVED BY THE NEVADA LEGISLATURE DURING THE 2017 SESSIONª

a The 2017 Nevada Legislature approved a ten-year prison population forecast to be applied to the Biennium planning model for the period July 2017 to June 2027. The forecast assumes that up to 200 inmates will be outsourced to another state and up to 357 parolees will be reporting to a day center. The out-of-state contract will reduce the in-house population without affecting the total population. Contracts to outsource beds are approved on a year-by-year basis.

Ten-Year Population Forecast Analysis

## Summary of Macroeconomic and Employment Indicators

Protective service occupations is a large occupational group that encompasses various sub-groups, such as police officers, firefighters, animal control workers, and correctional officers.

In CY 2016, Nevada employed, on the average, 41,050 workers in protective service positions in the public sector. The number of workers in this occupation is expected to increase to 48,284 by the end of Calendar Year 2018. The estimated number of individuals employed as correctional officers and jailers in Nevada in CY 2016 was 1,590 , and this number is expected to increase to 2,907 by the end of 2018 and to 2,985 by 2024. Protective service workers in Nevada earned, on the average, $\$ 16.09$ per hour, while these workers earned $\$ 18.59$ in the U.S. as a whole. The difference translated in an annual salary that was $\$ 5,200$ lower than the national.

The hourly wage rate in Nevada was not necessarily lower for each occupation within the protective service class, however. Correctional officers and jailers in Nevada earned slightly more ( $\$ 0.98$ per hour) than the U.S. as a whole. The difference in the hourly wage translated into an annual salary that was $\$ 2,030$ above the national for correctional officers and jailers.

The employment outlook for Nevada, as a whole, continued to look positive towards the end of CY 2017. In December, the unemployment rate was unchanged relative to the past quarter at $4.9 \%$, the civilian labor force increased by $1.53 \%$, and employment increased by $1.60 \%$.

A new fiscal year began in July of 2017 for the State of Nevada. NDOC 's FTE data are maintained on a fiscal year basis, given that the Nevada Legislature approves biennial budgets in June of each odd number year for the subsequent biennial cycle. For Fiscal Year 2018, which encompasses the period July 1st, 2017 to June 30, 2018, the Legislature authorized 999 non custody and 1,879 custody staff, inclusive of FTE positions not funded by the State's General Fund. The approved number is favorable relative to the former biennium with 15 additional positions being approved. The number of positions authorized by the Legislature for each fiscal year, however, stays constant unless special circumstances require adjustments. Movement in FTE levels in the third quarter was slower than during former quarters due to the NDOC instituting a temporary hiring freeze. Relative to the first and second quarters of Fiscal Year 2018, the third quarter of Fiscal Year 2018 gained 9 non-custody employees and experienced a loss of 6 non-custody saff. The total FTE increment over the quarter was 2.
