^a Beginning with Fiscal Year 2016, Cuban nationals are grouped with Hispanics.

Data Limitations:

Data published in this report were extracted from a live database; thus, it is possible that figures reported in tables and charts do not balance to totals reported in other reports published by the Nevada Department of Corrections (NDOC). Select distributions consist of estimates and are susceptible to rounding error and missing data that could have caused these distributions not to add up to exactly 100%. Current fiscal year data for the NDOC or for other agencies are not always available at time of edition; consequently, the NDOC performed its best effort to align data accordingly to derived estimates.

Unless specified, figures in this report are retrieved from the Nevada Department of Corrections InfoView data warehouse and from the Nevada Department of Corrections Offender Tracking System (NOTIS).

The NDOC must be able to identify offenders that fall in various age categories to determine the applicability of laws and regulations that are specific to the individual's actual age. Thus, Beginning with Fiscal Year 2016, age groups no longer encompass ages that are rounded down or up. The change in the methodology is expected to cause a small shift in the frequencies that fall in each group relative to former editions of this report.

The figures in this table represent the distribution of offenders by gender and highest offense across bookings with the NDOC. The highest offense is determined by a hierarchical method applied by the NDOC that consists of grouping instant offenses committed by the offender as per the severity of the offenses. Offenders are placed in the offense group that pertains to the most severe instant offense that he or she has committed.

Distribution of Offenders by Ethnicity In-House Population as of June 30, 2017

^a Trend changes from 2013 to 2014 are due to a system wide bed custody realignment.

^b The distributions for quarters ending December 2014 and March 2015 were estimated by applying the custody of each unit and wing at each correctional site to the in-house inmate population.

Custody Distributions

By the end of the first quarter of Fiscal Year 2016, minimum and medium custody decreased by 1.67% and 4.35% respectively and close custody went upwards by 9.74%. During the second quarter close custody declined by 4% and medium custody increased by 2.72% relative to the fourth quarter in Fiscal Year 2015. Minimum custody only declined by .06%. The change in close custody is, in part, attributed to the methodology utilized to account for inmates in administrative segregation. Thus, in the third quarter, close custody declined further to 27.04% from 28.17% in Fiscal Year 2015, and medium custody increased back to 57.60%. Declining rates in minimum and close custody are reversed in the fourth quarter with minimum custody increasing by 2.54% and close custody by 6.36%; in turn, medium custody fells by 3.66%. During the first quarter of Fiscal Year 2017, close custody increased by .94%, minimum custody fell by 1.78%, and medium custody stayed nearly flat. In the second quarter, medium custody declined by 5.55% and close custody increased by 10.30%. The shift towards close custody was due to changes in bed designations at HDSP In November. During the third quarter, medium custody and close custody decreased by less than 1%, while minimum custody increased by 1.35%. By the end of the fourth quarter, minimum custody increased further, spiking by 3.87%, meidum custody fell another 1.55% and close custody

The first few months of Fiscal Year 2016, a change of trend took place with minimum and close custody increasing by 11.92% and 40.64% respectively and medium custody decreasing by 10.75%. During the second quarter, medium custody increased by .055% and close custody declined by .145%. Minimum custody declined slightly, just .04%. During the third quarter, minimum custody increased back by 4%, medium decreased 5.9%, and close custody increased by 20.4%. In the fourth quarter, the appositive change in direction was seen, with minimum and close custody declining by 4.8% and 17.4%, respectively; and with the share of medium custody individuals increasing by 6.8%. During the first quarter of Fiscal Year 2017, close custody increases by 5.7%, minimum custody decreases by 3.3%, and medium custody is steady. During the second quarter, minimum custody didn't change, medium custody went up 1.6%, and close custody declined 6.7%. The shifting of custodies during the quarter is attributed to FMWCC opening Unit 10 to house the intake population. Unit 10 was not being utilized before the transfer and had been designated as medium. During the process, the population that moved to Unit 10 defaulted to medium custody, and then, changed to close custody. Unit 7 was not funded to house inmates. During the third quarter, minimum custody increase by 8.6%, while medium custody decreased by 1.8% and close custody by 4.7%. Quarter four was characterized by a pronounced decline in minimum custody inmates of 9.2%, an increase of 3.3% in medium custody, and no change

^a This table lists the correctional sites that have experienced escapes, walkaways, or recaptures only. A negative balance means that during the reporting month there were offenders recaptured but no escapes.

^b A negative balance represents an escape or walkaway in an earlier month/fiscal year and a recapture during the current month/fiscal year.

^a The prison population inclusive of residential confinement inmates, escapees, prisoners serving a sentence out of state, or intermediate sanction.

^b The in-house prison population consists of all inmates housed at an NDOC correctional location, and prisoners temporarily housed at a jail or admitted to a hospital.

^c Offenders admitted to the NDOC during the current biennium.

^d Offenders released from the NDOC during the current biennium.

^e Prisoner population forecasts derived by the JFA Institute/JFA Associates and approved by the Legislature for the current biennium.

^f The actual prison population .

The Mean Squared Error is the average of the squared differences between the actual and forecasted counts. The Root Mean Squared Error is the squared root Mean Squared Error.

^h The Root Mean Squared Error as percent of the actual average-to-date is a measure of prediction.

Summary of Macroeconomic and Employment Indicators

Protective service occupations is a large occupational group that encompasses various sub-groups, such as police officers, firefighters, animal control workers, and correctional officers.

Nevada is employing, on the average, 37,781 workers in protective service positions. The number of workers in this occupation is expected to increase to 40,617 by the end of Calendar Year 2017.

The estimated number of individuals employed as correctional officers and jailers in Nevada is 2,309, and this number is expected to increase to 2,376 by the end of 2017 and to 2,990 by 2024.

Protective services workers in Nevada earn, on the average, \$15.98 per hour, while these workers earn \$18.14 in the U.S. as a whole. The difference translates in an annual salary that is \$4,490 lower than the national.

The hourly wage rate in Nevada is not necessarily lower for each occupation within the protective service class, however.

Correctional officers and jailers in Nevada earn \$4.61 more per hour than the U.S. as a whole. The difference in the hourly wage translates into an annual salary that is \$9,600 above the national for correctional officers and jailers.

During the first quarter of Fiscal Year 2017, the number of non-custody FTE was reduced by 15, and the number of custody FTE by 16. During the second quarter, the vacancies were filled with 12.45 non-custody and 14 custody FTE being added. Quarter three resulted in a loss of approximately 7 non-custody and 5 custody FTE, but these losses were more than reversed in the fourth quarter with 7 non-custody and 25 custody positions being filled. Fluctuation from quarter to quarter is due to factors such as career progression, turnover, or retirements. Nevertheless, the number of positions authorized by the Legislature for each fiscal year stays constant unless special circumstances require adjustments.

The employment outlook for Nevada, as a whole, continued to improve further towards the end of CY 2017. From March to June, the unemployment rate decreased from 4.8% 4.7%. This improvement translated into an additional 2,931 labor units in the workforce being employed when adjusted for the effect of seasonality. The size of the civilian labor force also increased by 2,332 individuals.

Nevada Macroeconomic Indicators ^a	CY2017	CY2016	CY2015	CY2014
Labor Force (end of reporting period, civilian) ^e	1,441,574	1,434,386	1,420,938	1,404,168

Summary of Indicators

2.67%

3.54%

*Nevada's population rate of growth declined from 2.32% in 2010 to less than 1% in 2011. Beginning in 2012 the rate of growth has been gradually trending upwards from 1.26% to 1.71% in 2014 and by 1.82% in 2015, a rate that has been more than twice the growth in the U.S. Nevada's population continued to grow in 2016, but at a slower rate of 1.70%. In 2016, the U.S. population increased by only .70%.
