Total	1,349 10.05%	4,206 31.33%	3,590 26.74%	2,322 17.30%	1,432 10.67%	425 3.17%	100 0.74%	13,424 100.00%

<sup>a</sup> Beginning with Fiscal Year 2016, Cuban nationals were grouped with Hispanics.

<sup>b</sup> The NDOC must be able to identify offenders that fall in various age categories to determine the applicability of laws and regulations that are specific to the individual's actual age. Thus, Beginning with Fiscal Year 2016, age groups no longer encompass ages that are rounded down or up. The change in methodology may have caused a small shift in the frequencies that fall in each group relative to former editions of this report.

**Data Limitations:**

Data published in this report were extracted from a live database; thus, it is possible that figures reported in tables and charts do not balance to totals reported in other reports published by the Nevada Department of Corrections (NDOC). Select distributions consist of estimates and are susceptible to rounding error and missing data that could have caused these distributions not to add up to exactly 100%. Current fiscal year data for the NDOC or for other agencies are not always available at time of edition; consequently, the NDOC performed its best effort to align data accordingly to derived estimates.

Unless specified, figures in this report are retrieved from the Nevada Department of Corrections InfoView data warehouse and from the Nevada Department of Corrections Offender Tracking System (NOTIS).

## Imprisonment Statuses and Counties of Conviction for the Total Population

Imprisonment Status <sup>a</sup>	Males	%	Females	%	Total	%

a

The figures in this table represent the distribution of offenders by gender and highest offense across bookings with the NDOC. The highest offense is determined by a hierarchical method applied by the NDOC that consists of grouping instant offenses committed by the offender as per the severity of the offenses. Offenders are placed in the offense group that pertains to the most severe instant offense that he or she has committed.

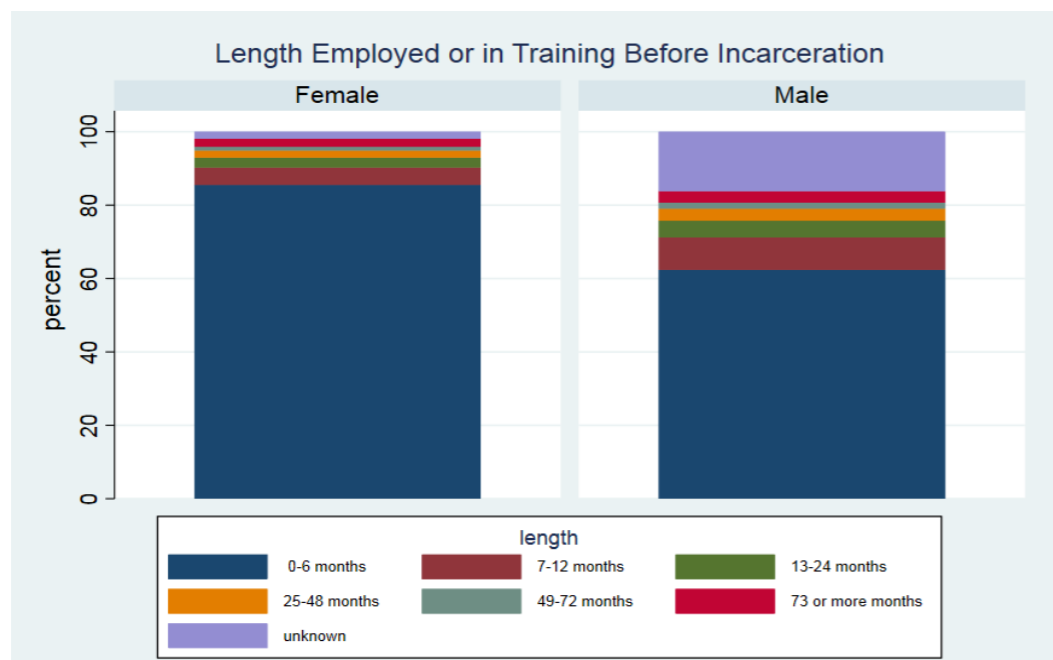

## Prison Population Characteristics

Range	0.54%	1.09%	1.10%	5.29%	2.22%	3.91%	

<sup>a</sup> Beginning in November 2017, the NDOC contracted private prison beds to house its excess population temporarily. The custody distribution displayed in this report assumes that the outsourced population is still housed in medium, close, or maximum custody housing units. Custody distribution series are maintained for master planning purposes and are entered into forecasting models that assume that these prisoners will return to one of the state facilities after the end of the contract period.

## Population by In-house Location and Custody Level

04/19	2.28	2.10
05/19	2.41	2.12
06/19	2.31	2.15
Average	2.40	2.13

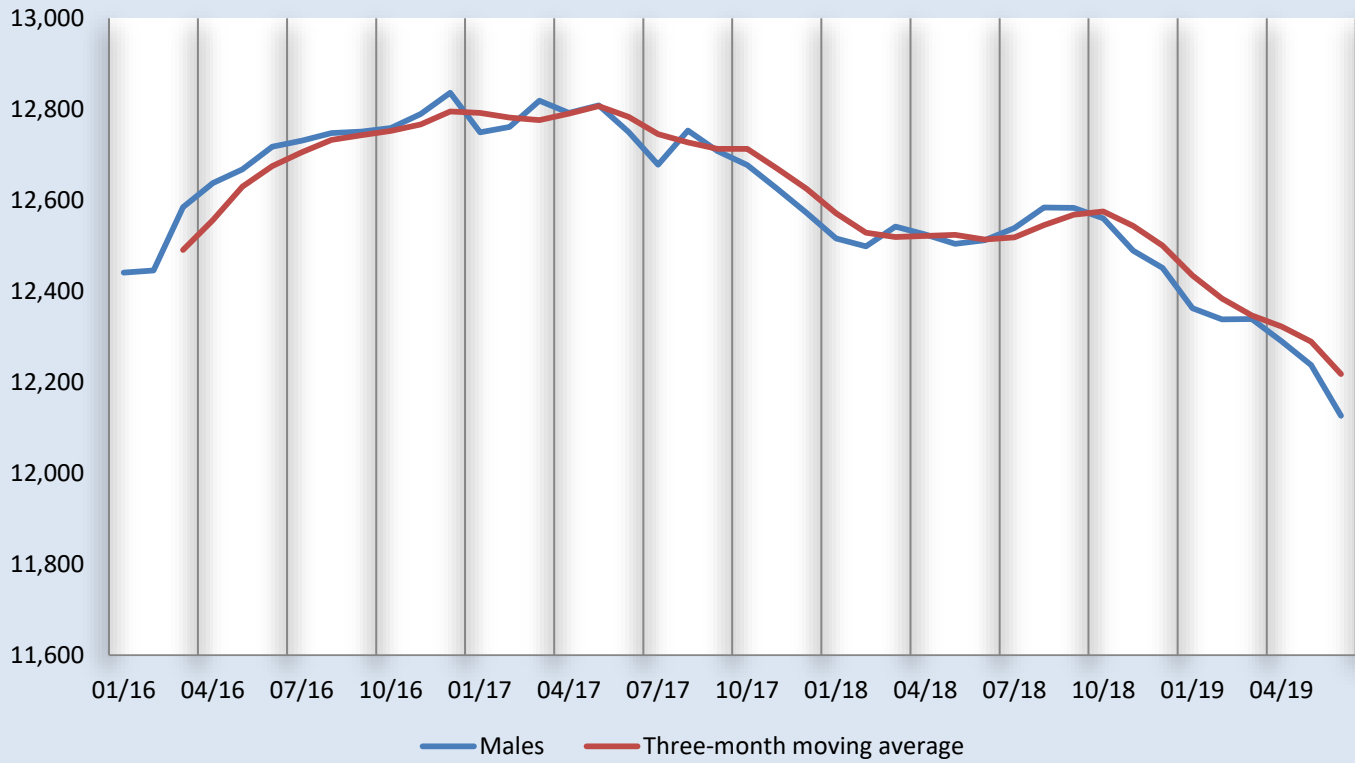

<sup>a</sup> The non-institutional population represents offenders not housed at an NDOC location, such as those on escape, on residential confinement, or serving a sentence out of state. However, offenders housed at private facilities are not included.

<sup>b</sup> Nevada Department of Corrections approved by the Legislature each Biennial Budget Cycle.

<sup>c</sup> Offenders housed in private prisons are treated as housed inside for planning and statistical purposes. It is assumed that these prisoners will return to a state facility at the end of the contract period.

<sup>a</sup> This table lists the correctional sites that have experienced escapes, walkaways, or recaptures only. A negative balance means that during the reporting month there were offenders recaptured but no escapes. In such cases, offenders escaped or walked away during a prior reporting period.

<sup>b</sup> For statistical purposes, it is assumed that the inmate is returned to the location from where he or she escaped or walked away.

<sup>a</sup> The prison population inclusive of residential confinement inmates, escapees, prisoners serving a sentence out of state, or intermediate sanction.

<sup>b</sup> The in-house prison population consists of all inmates housed at an NDOC correctional location, and prisoners temporarily housed at a jail or admitted to a hospital.

<sup>c</sup> Offenders admitted to the NDOC during the current biennium. The caseload is inclusive of offenders admitted to the parole housing program.

<sup>d</sup> Offenders released from the NDOC during the current biennium. The caseloads include offenders released to the Parole Housing Program, and then released to the community.

<sup>e</sup> Prisoner population forecasts derived by the JFA Institute/JFA Associates and approved by the Legislature for the current biennium.

<sup>f</sup> The actual prison population, inclusive of individuals within NDOC's jurisdiction housed in private facilities.

<sup>g</sup> The Mean Squared Error is the average of the squared differences between the actual and forecasted counts. The Root Mean Squared Error is the squared root of the Mean Squared Errors.

<sup>h</sup> The Root Mean Squared Error as percent of the actual average-to-date is a measure of prediction.

<sup>j</sup> Note: during 2017, there were 96 male beds allocated to the Parole Housing Program. This program provides temporary housing to inmates that are awarded parole and are still developing their housing arrangements in the community. In March of 2018, the number of beds for this program was reduced to 48. During Fiscal Year 2018, 265 men participated in the Parole Housing Program and 261 were released from the program to the community. Beginning in November 2018, 200 private prison beds were rented from another state to house inmates.

<sup>a</sup> The prison population inclusive of residential confinement inmates, escapees, prisoners serving a sentence out of state, and intermediate sanction offenders.

<sup>b</sup> The in-house prison population consists of all inmates housed at an NDOC correctional location, and prisoners temporarily housed at a jail or admitted to a hospital, and inmates in the intermediate sanction program.

<sup>c</sup> Offenders admitted to the NDOC during the current biennium.

<sup>d</sup> Offenders released from the NDOC during the current biennium.

<sup>e</sup> Prisoner population forecasts derived by the JFA Institute.

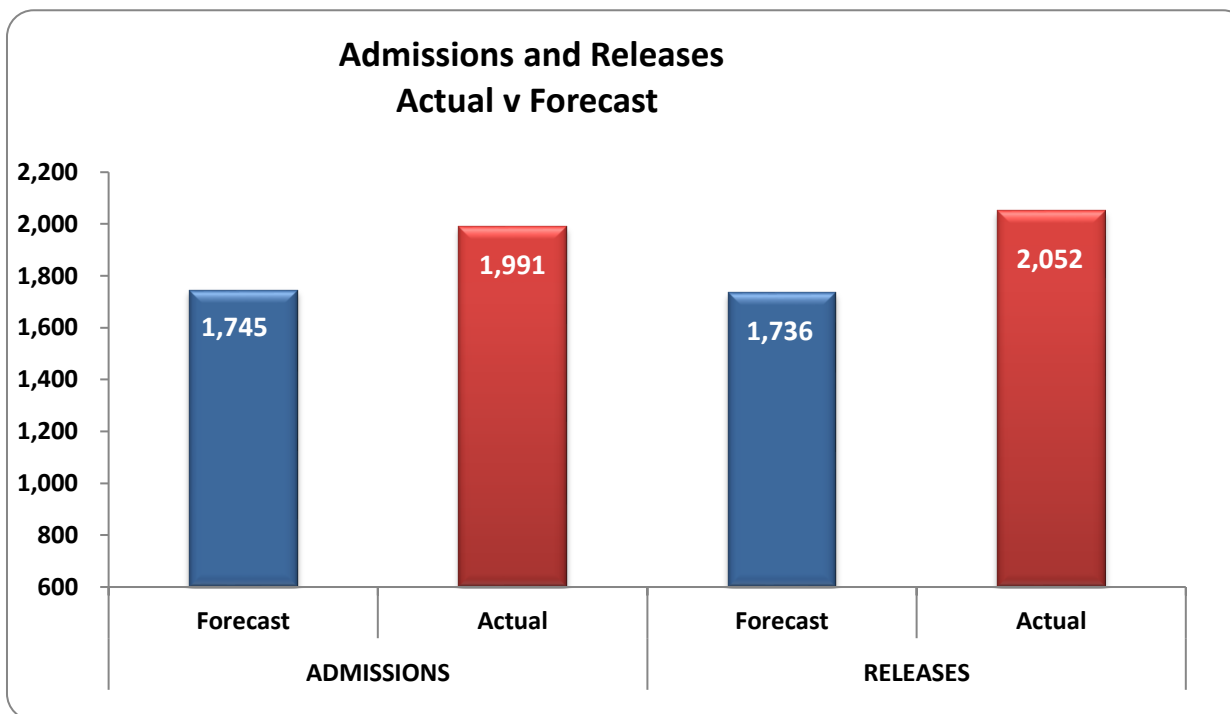

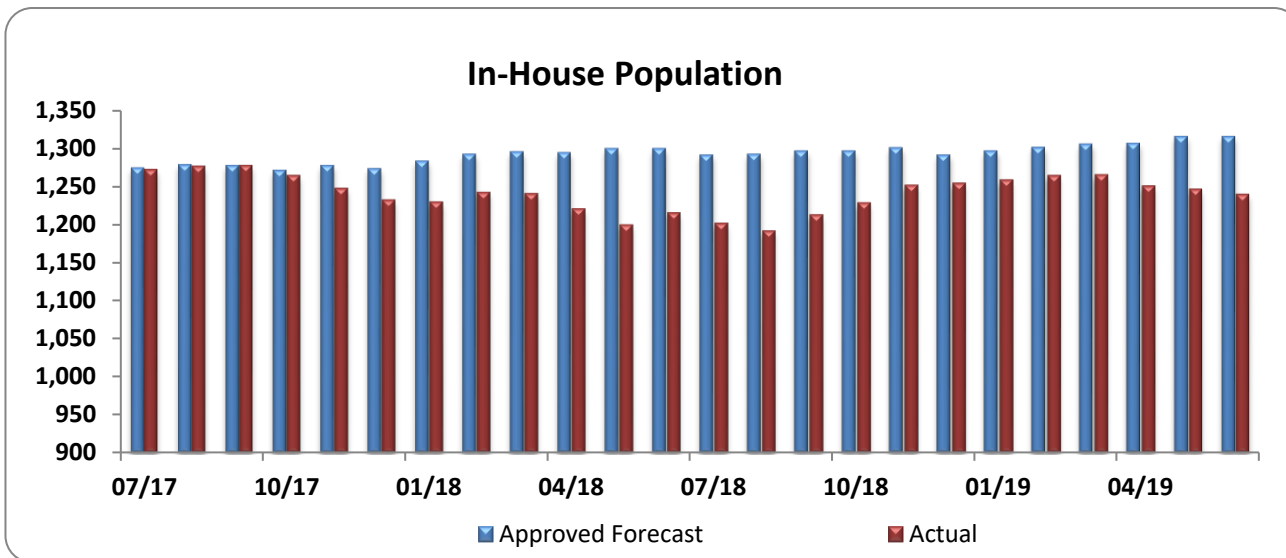

<sup>f</sup> The actual prison population of the NDOC.

<sup>g</sup> The Root Mean Squared Error is the squared root of the average of the squared differences between the actual and the forecast observations.

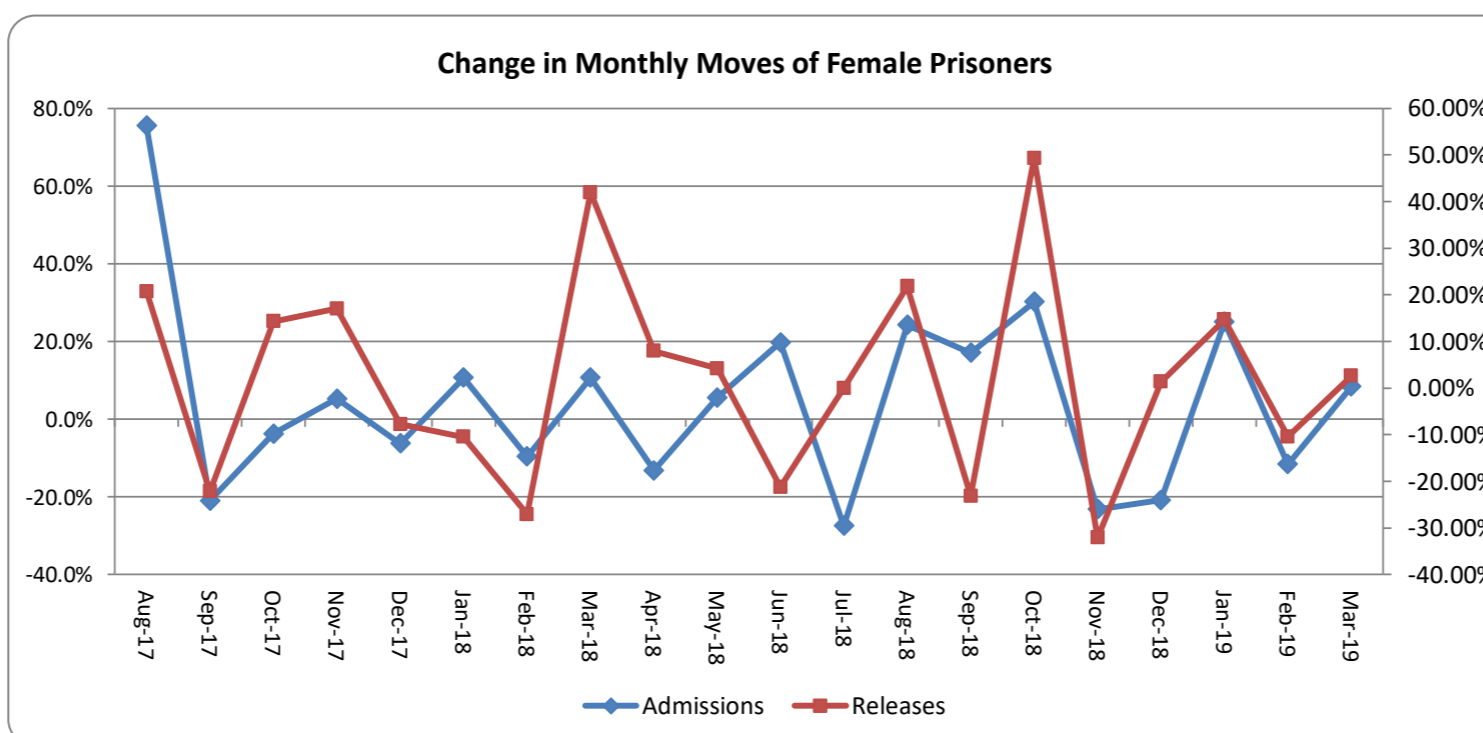

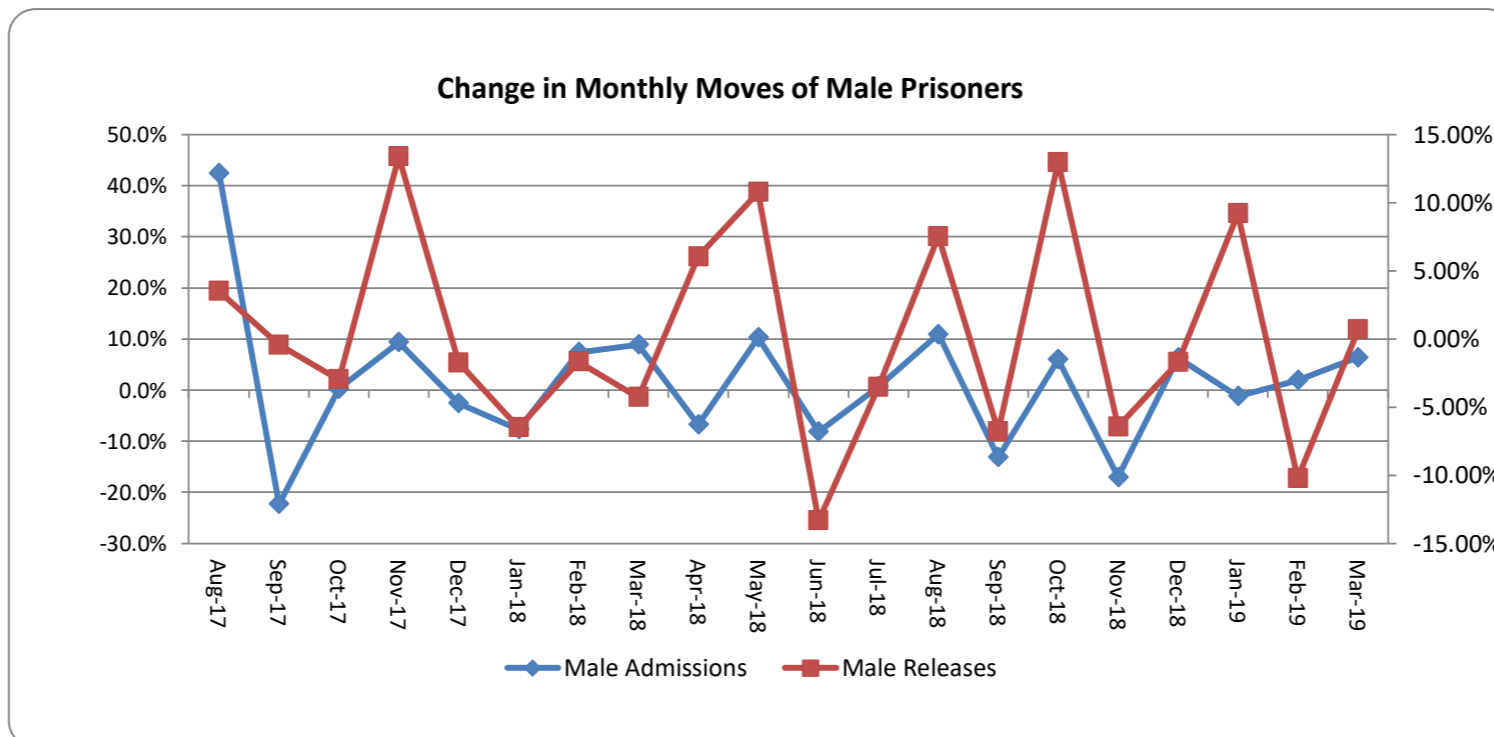

<sup>h</sup> The Root Mean Square Error as percentage of the actual average to date is a measure of prediction.

<sup>j</sup> Note: during 2017, there were 48 female beds allocated to the Parole Housing Program. At the end of Fiscal Year 2018 the number of beds was adjusted to 24. This program provides temporary housing to inmates that are awarded parole and are still developing their housing arrangements in the community. During the first half of Fiscal Year 2018, 119 males were admitted to the program and 118 female offenders were released to the community.

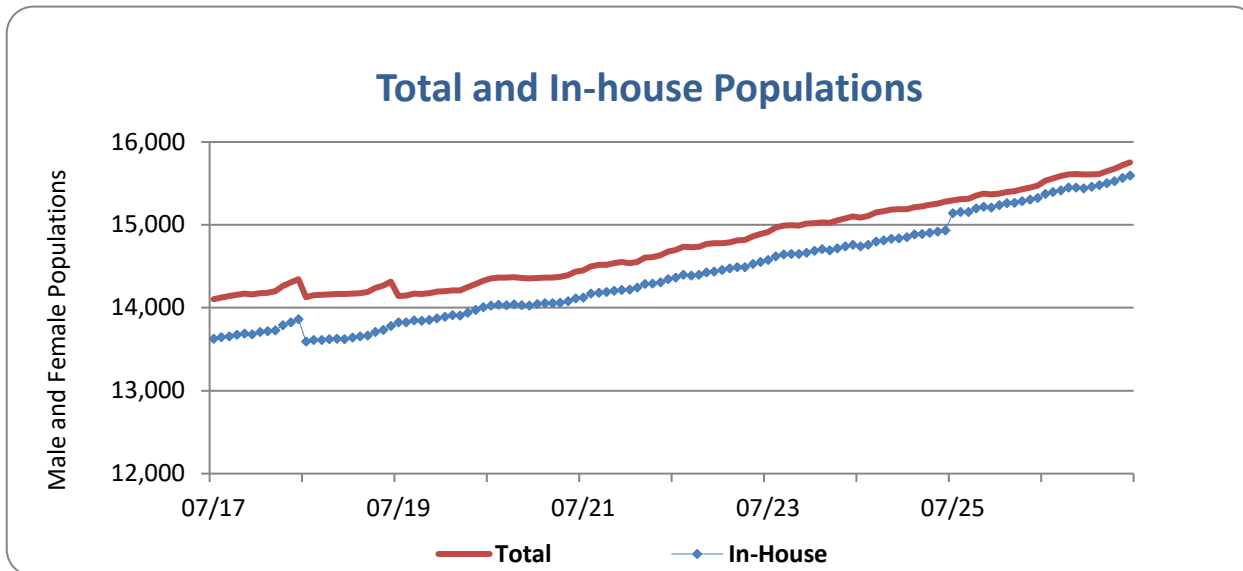

## Female Population Projection Comparison 2017-2019 Biennium

### Monthly Fluctuation in Prison Moves

# Ten-year Population Forecasts Approved by the 2017 Nevada Legislature<sup>a</sup>

- <sup>a</sup> The 2017 Nevada Legislature approved a ten-year prison population forecast to be applied to the Biennium planning model for the period July 2017 to June 2027.
- <sup>b</sup> Assumptions: up to 200 inmates will be outsourced to another state and up to 357 parolees will be reporting to a day center. The out-of-state contract will reduce the in-house population without affecting the total population. Contracts to outsource beds are approved on a year-by-year basis. The day reporting center is

## Ten-Year Population Forecast Analysis

Legislature Approved (June 30, 2017-June 20, 2027)			
Institutional Population <sup>a</sup>	Males	Females	Total
Ten-year Average	13,334	1,353	14,694

### Summary of Macroeconomic and Employment Indicators

- The employment outlook for Nevada as a whole continued to look positive at the end of the fourth quarter of CY 2019. In June of 2019, relative to December of 2018, the number of individuals employed increased by 1.50%, the size of the civilian labor force jumped 1.03%, and the unemployment rate decreased 0.49%.
- Protective service occupations is a large occupational group that encompasses various sub-groups, such as police officers, firefighters, animal control workers, and correctional officers employed by various industries.
- In CY 2016, Nevada employed, on the average, 41,050 workers in protective service positions across all industries who earned a median wage of \$20.12 per hour. The number of workers in this occupation was expected to increase by 6.8% to 43,875 by the end of Calendar Year 2019 and by 17.6% to 48,284 by 2024. As of May 2018, according to the Bureau of Labor Statistics, an estimated 42,650 protective service workers were employed in the State of Nevada, of which 2,680 worked as correctional officers or jailers for State government and earned a median wage of \$27.62 - a wage that is above that for all protective service jobs across all industries and for correctional officers and jailers in the U.S. as a whole.
- A new fiscal year began in July of 2018 for the State of Nevada. NDOC's full-time equivalent (FTE) data are maintained on a fiscal year basis, given that the Nevada Legislature approves biennial budgets in June of each odd number year for the subsequent biennial cycle. For State Fiscal Year 2019, which encompasses the period July 1st, 2018 to June 30, 2019, the Legislature authorized 897 non-custody and 1,889 custody staff, inclusive of FTE positions funded by the State's General Fund. The approved number is favorable relative to the former biennium with 15 additional positions being approved. At fiscal-year-end, the NDOC employed 2,647.97 FTE.
- During the the fourth quarter of SFY 2019, the NDOC experienced a gain of 5 security and 11

Larceny	▼ -3.64%	▼ -5.89%
Motor vehicle theft	▼ -8.19%	▼ -3.58%

- From 2017 to 2018, the size of the U.S. population increased by 0.44% while Nevada's increased by 1.21%.
- In Nevada, the largest decline was in murder and manslaughter (-26.37%) , while for the U.S. the greatest decline was in burglary crime (-12.64%).
- Crime rates in Nevada were as low as 6.7 per 100,000 inhabitants for murder and manslaughter and as large as 2,438.2 per 100,000 for aggravated assault.
- In all of the U.S. murder and manslaughter was as low as 5.0 per 100,000 inhabitants and property crime as large as 2,199.5 per 100,000.
- Nevada shares common characteristics with all of the U.S. in that property and larceny are the two major UCR crimes. Violent crime and rape rates, however, are more pronounced in Nevada, while larceny-theft crime is more pronounced in the U.S. as a whole.
- Although crime in Nevada has declined, overall, rape increased by 21.90% during 2018 while in the U.S. it increased by only 2.16%. Aggravated assault in Nevada increased by 2.51% versus -0.84% in the U.S. as a whole.

Crime Rate per 100,000 in Ascending Order		
UCR Crime	Nevada	U.S.
Murder	6.7	5.0
Rape	76.8	42.6
Robbery	127.3	86.2
Vehicle theft	330.4	246.8
Assault	392.3	228.9
Violence	541.1	368.9
Burglary	584.7	376.0
Larceny-theft	1,461.2	1,594.6
Property	2,438.2	2,199.5
