Data Limitations:

Data published in this report were extracted from a live database; thus, it is possible that figures reported in tables and charts do not balance to totals reported in other reports published by the Nevada Department of Corrections (NDOC). Select distributions consist of estimates and are susceptible to rounding error and missing data that could have caused these distributions not to add up to exactly 100%. Current fiscal year data for the NDOC or for other agencies are not always available at time of edition; consequently, the NDOC performed its best effort to align data accordingly to derived estimates.

^a Trend changes from 2013 to 2014 are due to a system wide bed custody realignment.

^b The distributions for quarters ending December 2014 and March 2015 were estimated by applying the custody of each unit and wing at each correctional site to the in-house inmate population.

^a The prison population inclusive of residential confinement inmates, escapees, prisoners serving a sentence out of state, or intermediate sanction.

^b The in-house prison population consists of all inmates housed at an NDOC correctional location, and prisoners temporarily housed at a jail or admitted to a hospital.

^c Offenders admitted to the NDOC during the current biennium.

^d Offenders released from the NDOC during the current biennium.

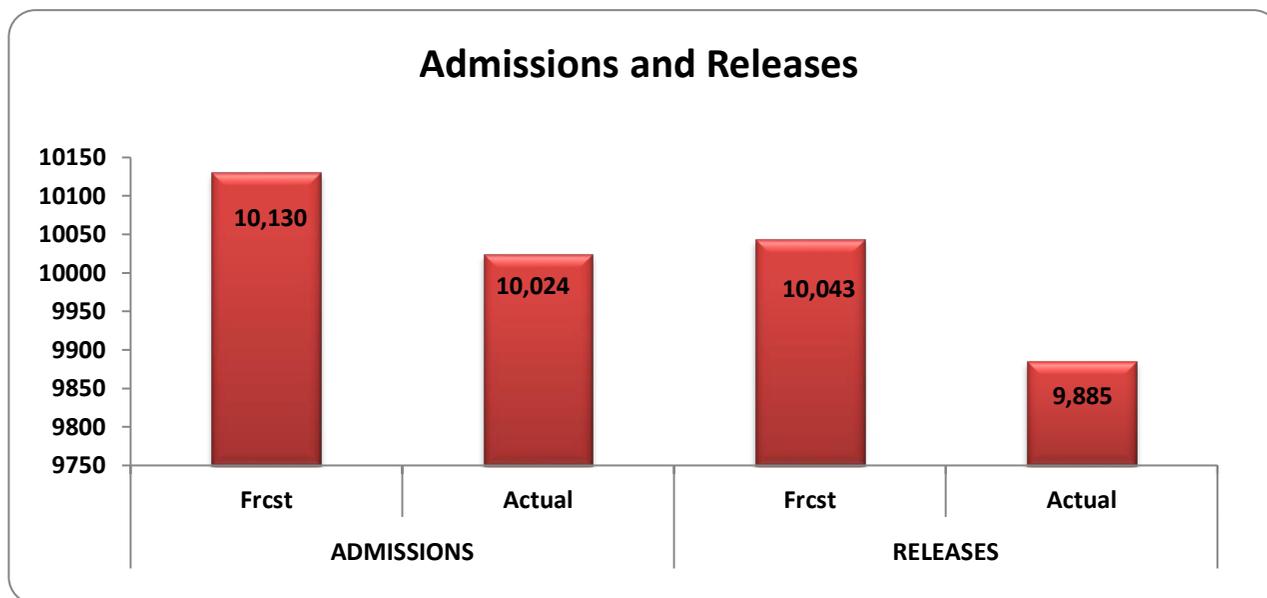

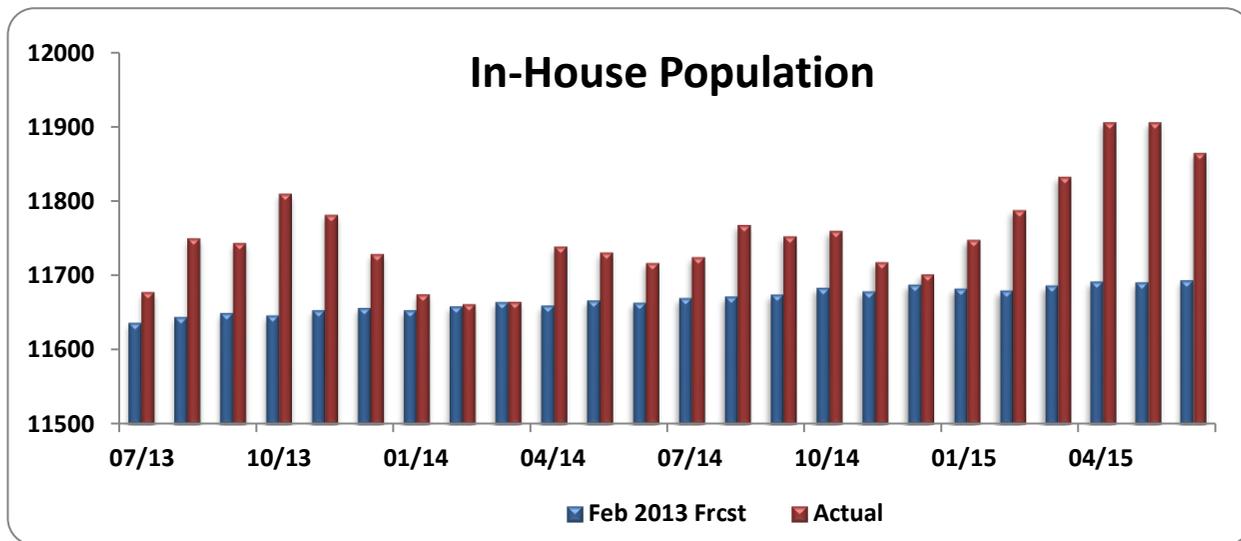

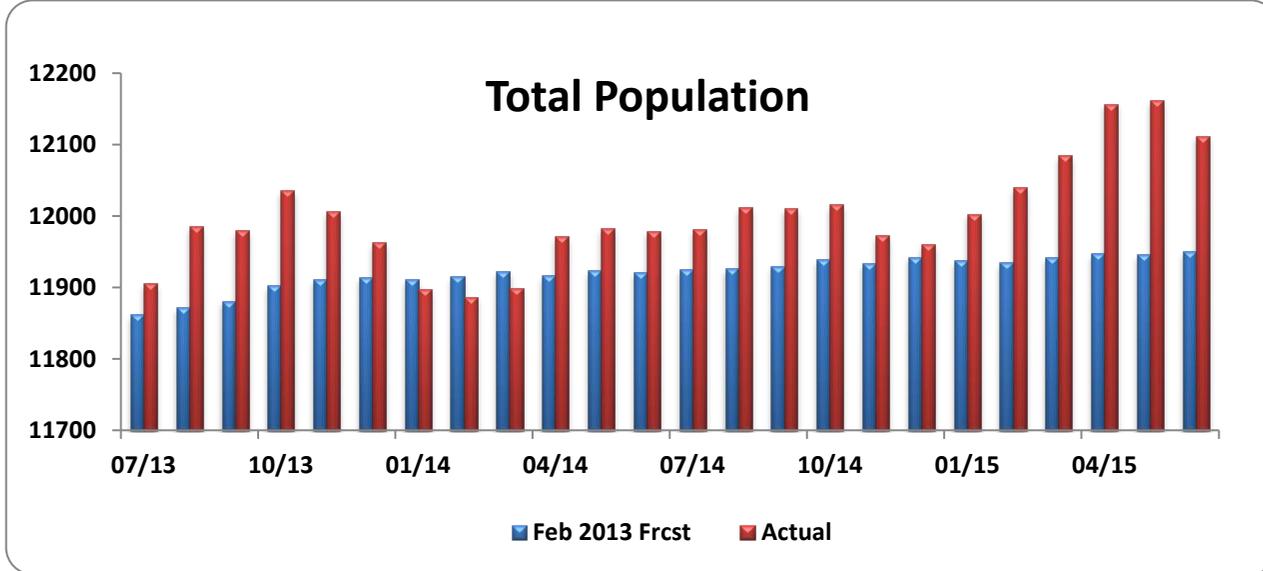

^e Prisoner population forecasts derived by the JFA Institute/JFA Associates and approved by the Legislature for the current biennium.

^f The actual prison population .

^g The Root Mean Squared Error is the squared root of the average of the squared differences between the actual and the forecast observations (the standard deviation of the forecast).

^h The Root Mean Squared Error as percentage of the actual average-to-date is a measure of prediction.
