^a Beginning with Fiscal Year 2016, Cuban nationals were grouped with Hispanics.

^b The NDOC must be able to identify offenders that fall in various age categories to determine the applicability of laws and regulations that are specific to the individual's actual age. Thus, Beginning with Fiscal Year 2016, age groups no longer encompass ages that are rounded down or up. The change in methodology may have caused a small shift in the frequencies that fall in each group relative to former editions of this report.

Data Limitations:

Data published in this report were extracted from a live database; thus, it is possible that figures reported in tables and charts do not balance to totals reported in other reports published by the Nevada Department of Corrections (NDOC). Select distributions consist of estimates and are susceptible to rounding error and missing data that could have caused these distributions not to add up to exactly 100%. Current fiscal year data for the NDOC or for other agencies are not always available at time of edition; consequently, the NDOC performed its best effort to align data accordingly to derived estimates.

Unless specified, figures in this report are retrieved from the Nevada Department of Corrections InfoView data warehouse and from the Nevada Department of Corrections Offender Tracking System (NOTIS).

^a The figures in this table represent the distribution of offenders by gender and the most serious active offense. The highest offense is determined by a hierarchical method applied by the NDOC that consists of grouping instant offenses committed by the offender as per the severity of the offenses. Offenders are placed in the offense group that pertains to the most severe offense(s) that he or she is serving.

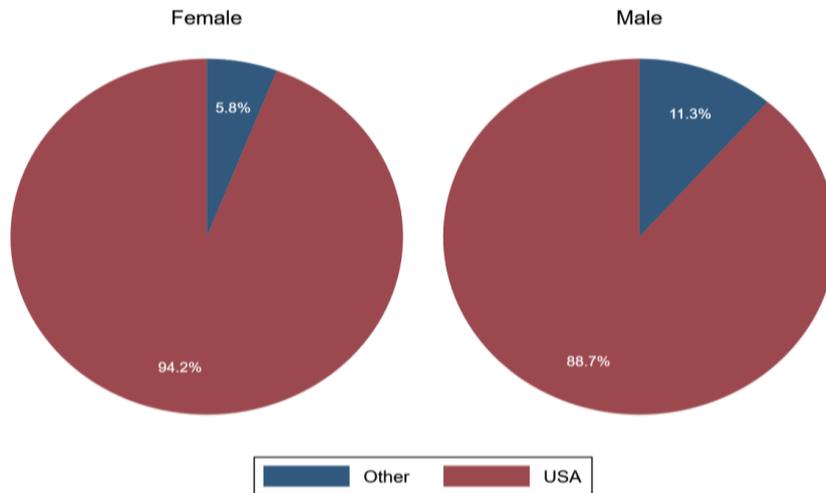

^b The total number of offenders by most severe active offense group and offense category don't add up to the same total as the other distributions presented in this report, given that this total includes offenders in the custody of the NDOC from other jurisdictions as well as offenders are on escape/inactive status.

^a Beginning in November 2017, the NDOC contracted private prison beds to house its excess population temporarily. The custody distribution displayed in this report includes 100-200 individuals housed in a private facility through October 2020. Custody distribution series are maintained for master planning purposes and are entered into forecasting models that assume that these prisoners will return to one of the state facilities after the end of the contract period.

^a This table lists the correctional sites that have experienced escapes, walkaways, or recaptures only. A negative balance means that during the reporting month the correctional site recaptured offenders that escaped in previous reporting periods.

^b For statistical purposes, it is assumed that the inmate is returned to the location from where he or she escaped or walked away, although inmates are recaptured by law enforcement and then re-admitted to an NDOC intake center.

^a The prison population inclusive of residential confinement inmates, escapees, prisoners serving a sentence out of state, or intermediate sanction.

^b The in-house prison population consists of all inmates housed at an NDOC correctional location, and prisoners temporarily housed at a jail or admitted to a hospital.

^c Offenders admitted to the NDOC during the current biennium. The caseload is inclusive of offenders admitted to the parole housing program.

^d Offenders released from the NDOC during the current biennium. The caseloads include offenders released to the Parole Housing Program, and then released to the community.

^e Prisoner population forecasts derived by the JFA Institute/JFA Associates and approved by the Legislature for the current biennium.

^f The actual prison population, inclusive of individuals within NDOC's jurisdiction housed in private facilities.

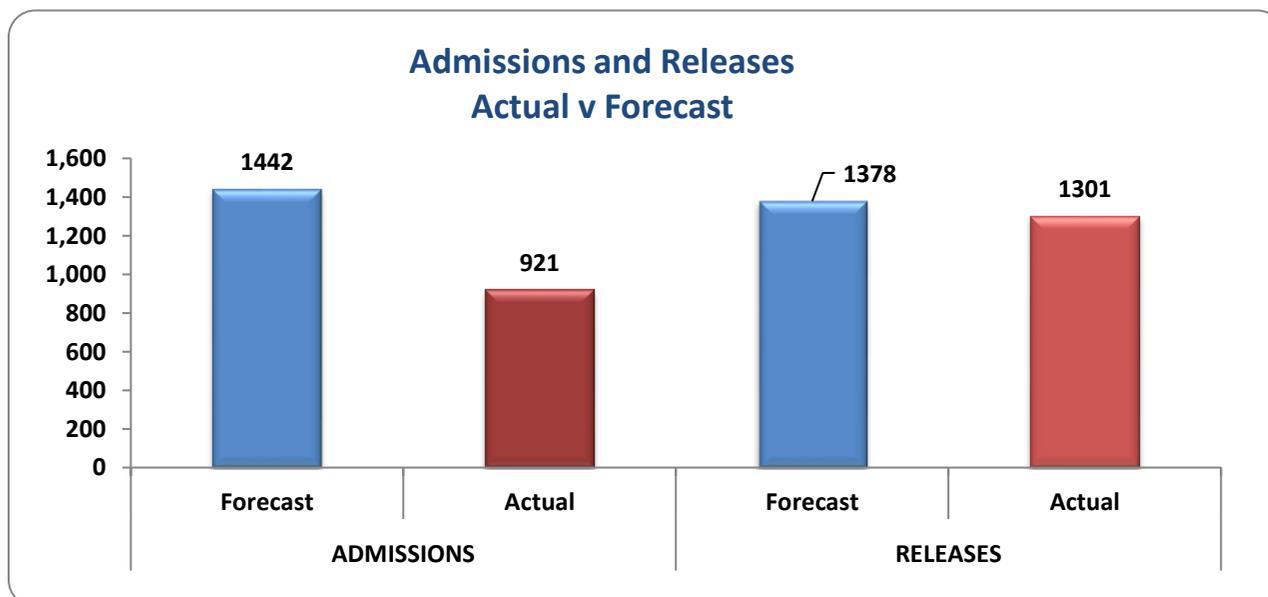

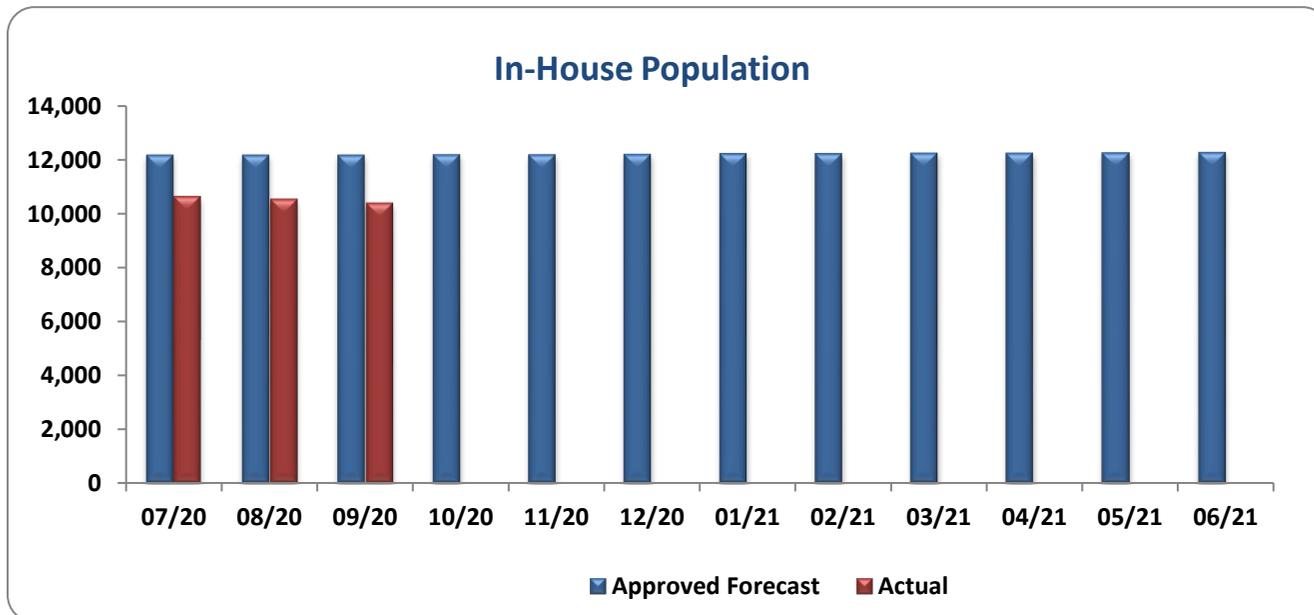

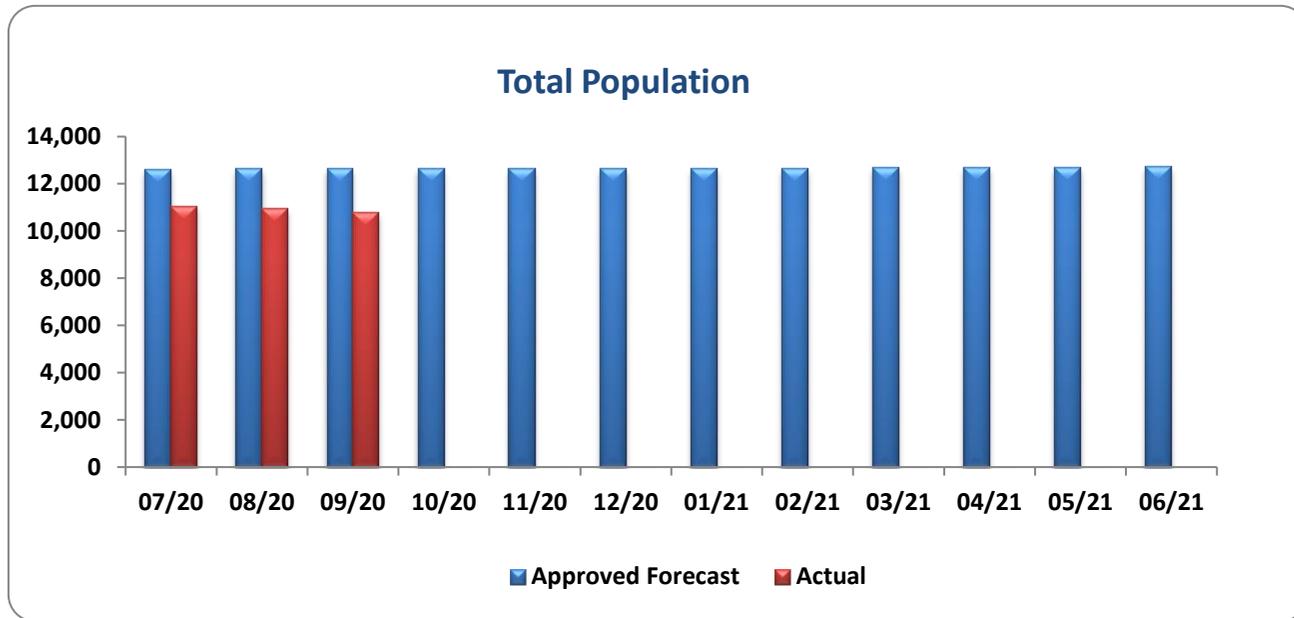

^g The Mean Squared Error is the average of the squared differences between the actual and forecasted counts. The Root Mean Squared Error is the squared root of the Mean Squared Errors.

^h The Root Mean Squared Error as percent of the actual average-to-date is a measure of prediction.

^g Note: Casa Grande Transition House offers a program for individuals that are granted parole, are authorized to work in the community, and for whom housing arrangements in the community are pending. During State Fiscal Year, 106 inmates were transferred from a housing location within NDOC to the Parole Housing Unit. The Parole Housing Program, however, was phased out in the summer of 2020.

^h Beginning in November 2017, 100- 200 private prison beds were rented while the NDOC was awaiting the completion of retrofitting projects. The contract ended November 2019.

^a The prison population inclusive of residential confinement inmates, escapees, prisoners serving a sentence out of state, and intermediate sanction offenders.

^b The in-house prison population consists of all inmates housed at an NDOC correctional location, and prisoners temporarily housed at a jail or admitted to a hospital, and inmates in the intermediate sanction program.

^c Offenders admitted to the NDOC during the current biennium.

^d Offenders released from the NDOC during the current biennium.

^e Prisoner population forecasts derived by the JFA Institute.

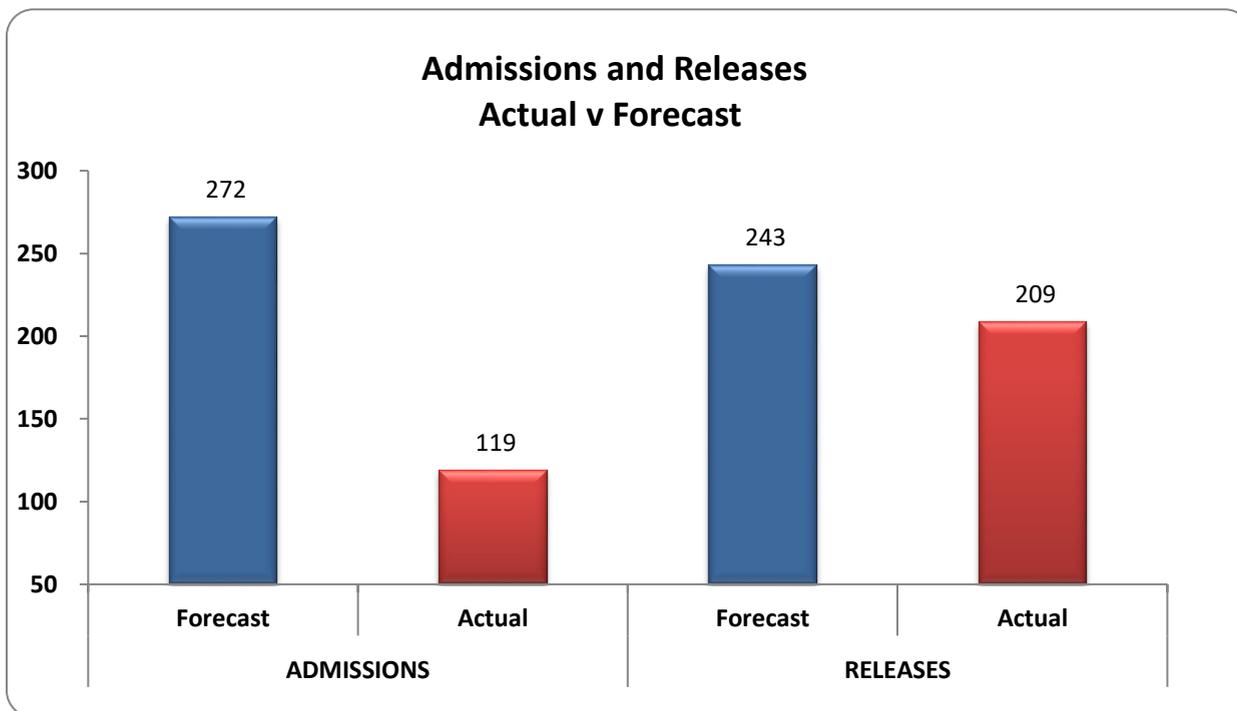

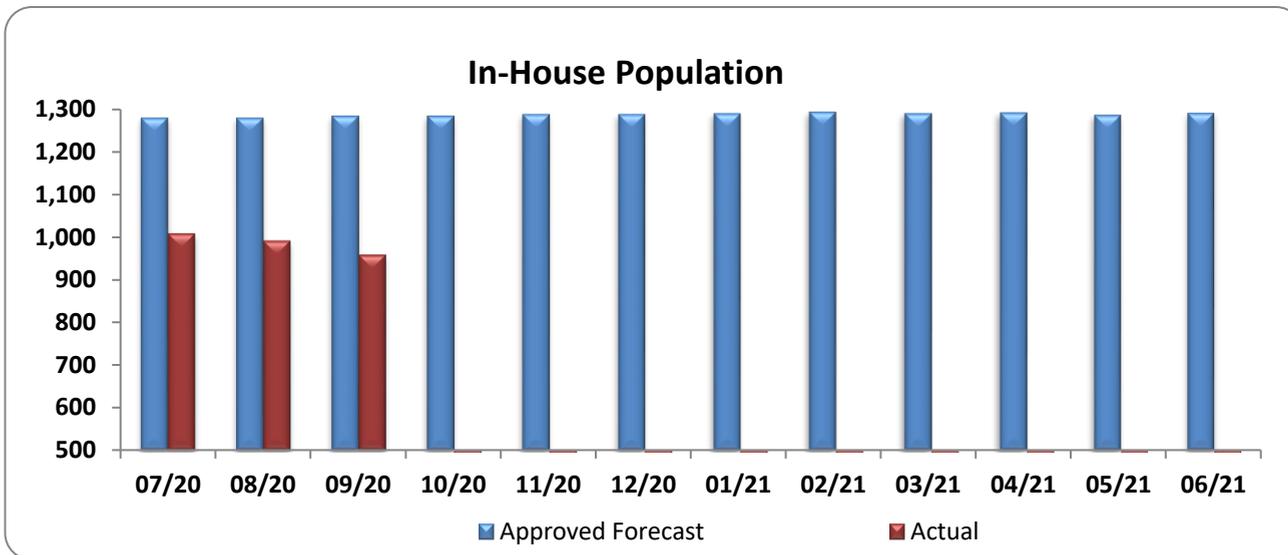

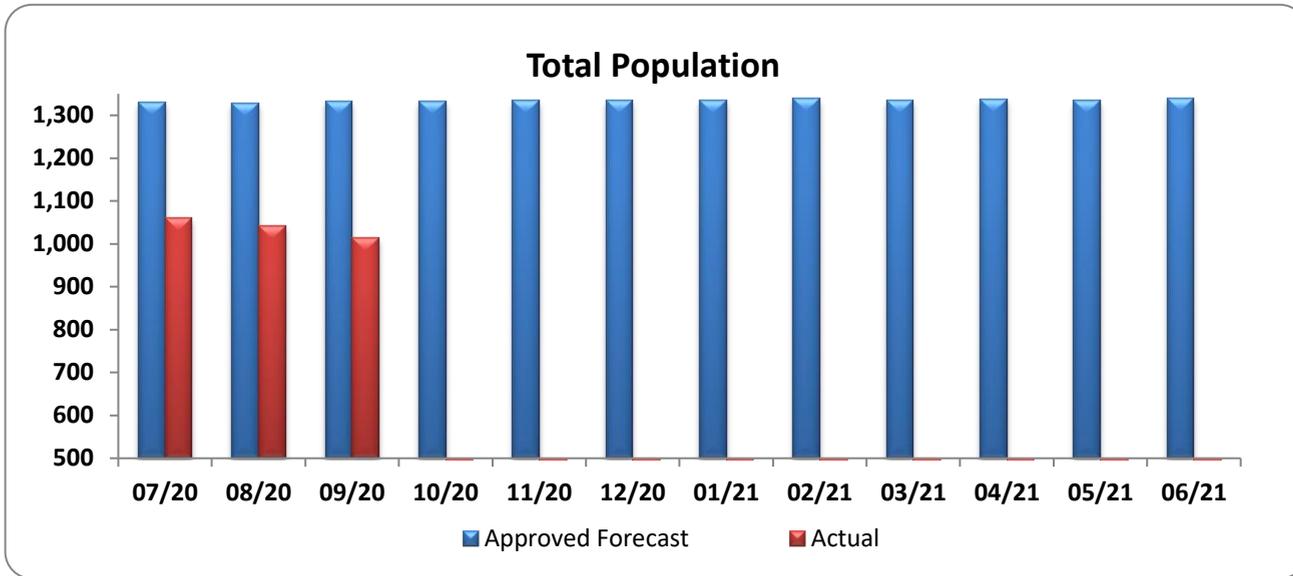

^f The actual prison population of the NDOC.

^g The Root Mean Squared Error is the squared root of the average of the squared differences between the actual and the forecast observations.

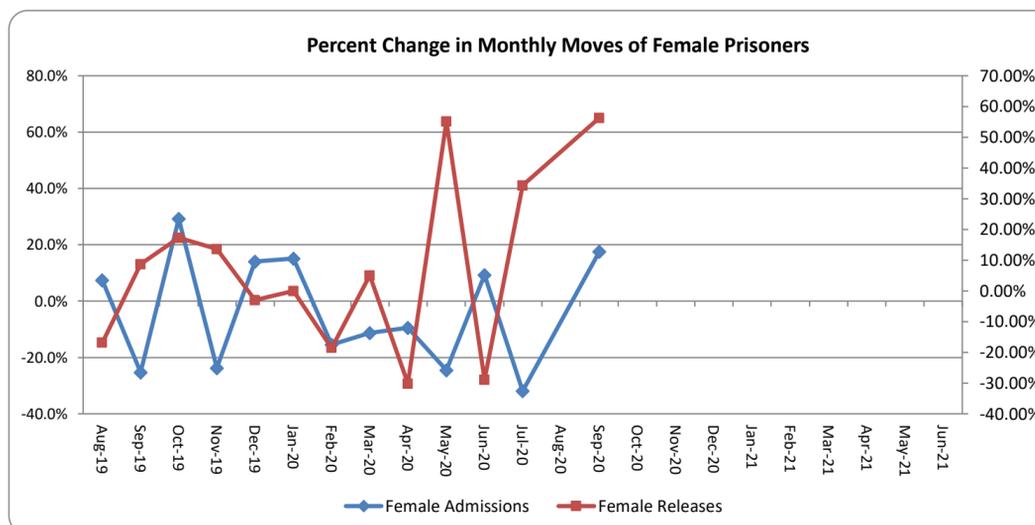

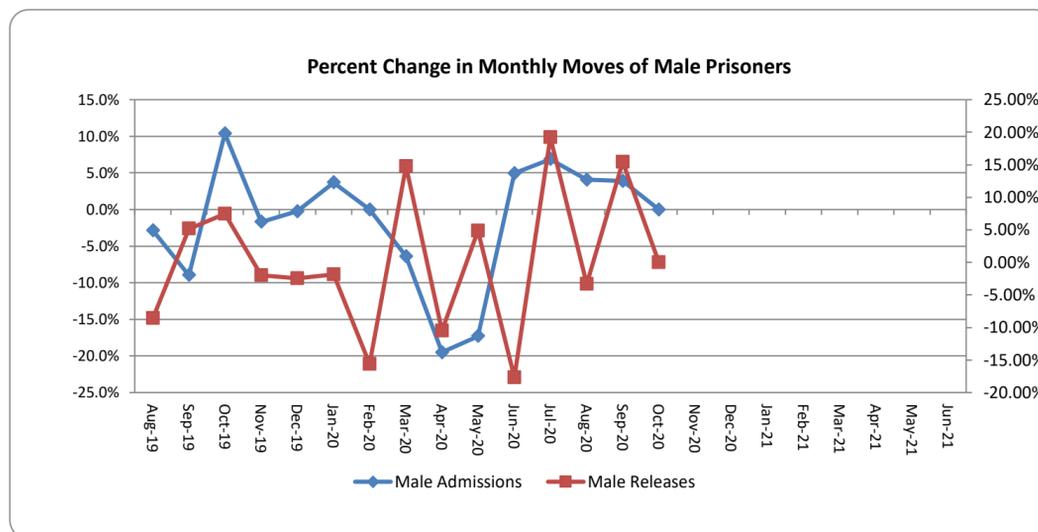

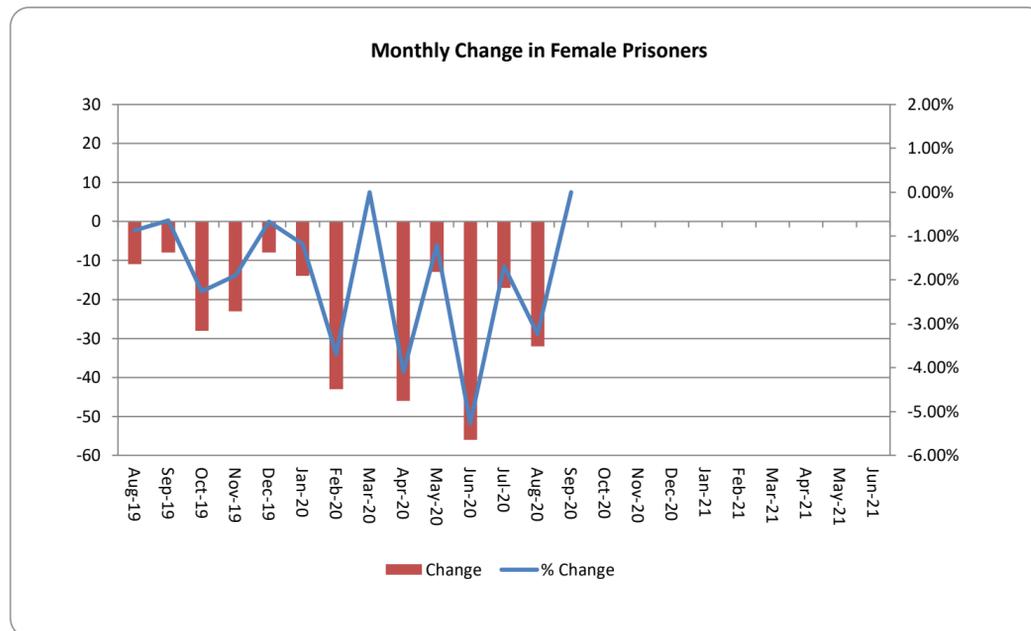

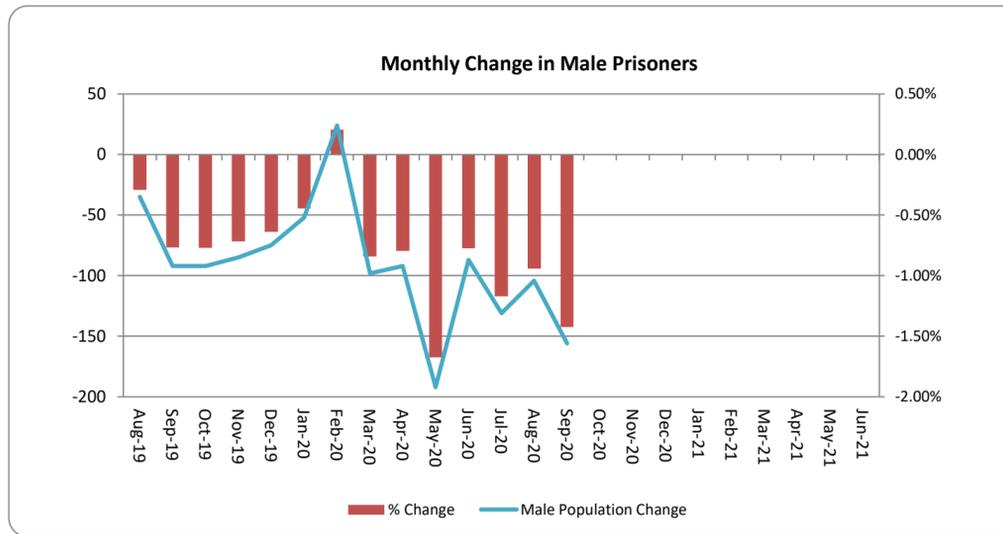

^h The Root Mean Square Error as percentage of the actual average to date is a measure of prediction.

ⁱ Note: Casa Grande Transition House provides temporary housing for inmates that are granted parole, are authorized to work in the community, and for whom housing arrangements in the community are pending. During State Fiscal Year 2020, 61 females were admitted to the program. This program, however, was phased out in the summer of 2020.

Summary of Macroeconomic and Employment Indicators

- The seasonally adjusted unemployment rate of 12.7% during the third quarter of Calendar Year 2020 12.7%, a 17% drop from the second quarter, was a reflection of the effect of the COVID-19 Pandemic. The crisis significantly affected many service occupations in Nevada's hospitality and retail industries.
- Per capita personal income was down 5.69% during the third quarter relative to the second quarter, but up 2.61% relative to the first quarter.
- Protective service occupations is a large occupational group that encompasses various sub-groups, such as police officers, firefighters, animal control workers, correctional officers employed by various industries and public sector, and first-line supervisors in the group. According to the U.S. Bureau of Labor Statistics, this occupational group is expected to increase 4.5% through 2024.
- According to the Nevada Department of Employment, Training, and Rehabilitation, this protective service occupational group was expected to employ 38,724 individuals, with 2,809 specifically working as correctional officers and jailers, representing between 0.18% and 0.19% of total employment in Nevada.
- According to the U.S. Bureau of Labor Statistics, correctional officers and jailers in Nevada earned a mean hourly wage of \$31.33 and a mean annual salary of \$65,170, fairs 24.52% better than the national average.
- For Fiscal Year 2021, the 2019 Nevada Legislature authorized 912 non-custody and 1,910 custody full-time positions, a decrease of 2 from Fiscal Year 2020. At the end of September 2020, 1,715 security and 875 non-security positions were filled. Filled positions were below budgeted positions for various reasons, such as the ability to recruit officers in remote areas of the state, retirements, and the hiring freeze instituted in March 2020 to help reduce the budget short-fall caused by the COVID-19 pandemic.
