VIAPATH'S INMATE FAMILY PREPAY

A Service for Family and Friends

Family members and friends of inmates are given the option to set up prefunded calling accounts using credit or debit cards, cash deposited at Western Union, checks or money orders. Calls that may otherwise be blocked are now completed through ViaPath's AdvancePay program.

How Does It Work?

AdvancePay is a prefunded collect calling service that allows calls from an inmate in a correctional facility to your telephone number without the restrictions of standard billing. When an inmate attempts to dial an unbillable number, AdvancePay will provide the option to the called party to set up a prefunded account. After a prefunded account is established, collect calls to the telephone number may be placed up to the prefunded amount in the account. After funds are depleted, the system will prompt the account holder to add funds.

For more complete account management, you can make deposits and view your balance at connectnetwork.com.

Never Miss a Call

AdvancePay account holders can rest assured that they alone manage their accounts, ensuring that their important calls will be received. Our automated systems contact account holders when additional funds need to be added. To facilitate future deposit transactions, credit and debit card numbers can be securely stored. An option to automatically fund an account with a stored credit or debit card when funds are nearly exhausted is also available.

How to avoid disconnection!

-  DON'T attempt a 3-way call
-  DON'T try to transfer the call
-  DON'T put the inmate on hold
-  DON'T use or answer "call waiting"
-  DON'T press numbers on the touch tone pad during the call (on both inmate phone and called party phone)
-  DON'T stop the conversation for any length of time because even short pauses may result in a disconnection
